Pre-Doctoral Trainees

- 2015-Present Somjen Frazer
- 2014-2016 Nadav Antebi, PhD
 Current Position: Post-doctoral Researcher, Center for HIV/AIDS Education Studies & Training (CHEST), Hunter College, City University of New York
- 2014-Present Tracy Pugh
- 2012-Present Amaya Perez-Brumer

Post-Doctoral Trainees

- 2018-present Jessie Ford, PhD
 Post-doctoral Fellow, supported by R01 MH112384 (MPIs: Hatzenbuehler & Dodge)
- 2017-present Micah Lattanner, PhD
 Post-doctoral Fellow, Psychiatric Epidemiology Training (PET) T32 Program, Columbia University
- 2016-present Seth Prins, PhD
 Post-doctoral Fellow, HIV and Substance Use in the Criminal Justice System T32 Program, Columbia University
- 2015-present Robert-Paul Juster, PhD

Post-doctoral Fellow, supported by Québec Fonds de la recherche Santé, post-doctoral training fellowship (\$90,000)

Project Title: Intersecting the Structural Stigma and Chronic Stress of Sexual Minorities

2014-2016 David Doyle, PhD
Post-doctoral Fellow, Psychiatric Epidemiology Training (PET) T32 Program, Columbia University
Current Position: Lecturer in Social Psychology, University of Exeter, United Kingdom

Other Trainee Advisory Roles

- 2016-present Mentored Research Scientist Development Award to Morgan Philbin (K01 DA039804)
Title: Assessing the Impact of State-Level Policies on Drug Use and HIV Risk for Young Men Who Have Sex with Men
Role: Collaborator
- 2016-present HIV and Substance Use in the Criminal Justice System T32 Program, Columbia University
Role: Affiliated Faculty. Mentor for Seth Prins, PhD.
Description: The goal of this training program is to provide training to the next generation of pre- and post-doctoral scholars in the prevention, treatment, and care of HIV and drug abuse among individuals in the criminal justice system with a strong emphasis on individuals involved in alternatives to incarceration and community supervision (e.g., diversion programs, probation, and community and drug courts) who are affected by health disparities.
- 2015-present Gender, Sexuality and Health (GSH) T32 program, Columbia University
Role: Primary Faculty Member and Co-Director. Mentor for Amaya Perez-Brumer and Somjen Frazer.
Description: The GSH training program is the nation's first multidisciplinary doctoral training program in gender, sexuality, and health. This unique program prepares students for research and teaching careers focusing on the role of gender and sexuality in shaping reproductive and sexual health, both in the United States and abroad.
- 2014-present Initiative for Maximizing Student Development (IMSD) Program (R25), Columbia University
Role: Mentor for Tracy Pugh
Description: IMSD is an NIH-funded student development program for institutions with research-intensive environments. The goal of the program is to increase the number of students from underrepresented groups in biomedical and behavioral research who complete Ph.D. degrees in these fields. The program offers an opportunity to develop new or expand existing effective academic developmental programs, including student research internships, in order to prepare students from underrepresented groups for competitive research careers and leadership positions in the biomedical or behavioral sciences.
- 2014-present Psychiatric Epidemiology Training (PET) T32 Program, Columbia University
Role: Affiliated Faculty. Mentor for David Doyle, PhD and Micah Lattanner, PhD.
Description: The mission of the PET program is to equip new generations of pre- and post-doctoral fellows with the skills and vision needed to conceptualize, measure, and test ideas about psychiatric disorders that will advance the field in both incremental and ground-breaking ways. To fulfill this mission, the program emphasizes a framework for investigating the etiology, course, and consequences of mental illness that highlights the dynamic interplay of multiple levels, that is, a person (biology, psychology), in context (family, social network, neighborhood, workplace, society) through time (person and contextual change).

- 2013-present Substance Abuse Epidemiology Training Program T32, Columbia University
Role: Affiliated Faculty
Description: The program objectives are to train promising individuals from different disciplines to conceptualize, plan, and conduct epidemiologic research on the causes, consequences and use of treatment for substance use and substance use disorders. The program accomplishes its objectives by providing well-qualified junior scientists with a strong foundation in relevant substantive and methodological areas that will prepare them for successful careers and leadership in substance abuse epidemiology.
- 2012-2016 Robert Wood Johnson Foundation Health & Society Scholars (HSS) Post-Doctoral Fellowship, Columbia University
Role: Affiliated Faculty
Description: The goal of the HSS program was to improve population health by training scholars to: (1) investigate connections among biological, genetic, behavioral, environmental, economic, and social determinants of health; and (2) develop, evaluate, and disseminate knowledge, interventions, and policies that integrate and act on these determinants to improve health. The program was intended to produce leaders who would change the questions asked, the methods employed to analyze problems, and the range of solutions to reduce population health disparities and improve the health of all Americans.
- 2012-2016 Center for the Study of Social Inequalities and Health, Mailman School of Public Health, Columbia University
Role: Co-Director (with Drs. Bruce Link & Jo Phelan)
Description: The Center for the Study of Social Inequalities and Health served as the focal point at the Mailman School for creating and acting upon knowledge about the consequences of inequality for health. It pursued several goals, including: 1) producing knowledge about inequalities and health through research that bears a strong theoretical foundation and a high degree of empirical rigor; 2) training and mentoring young scholars and students who have the capacity to conduct research on inequality and its relation to health; and 3) creating and sustaining a climate that fosters diversity in the faculty, staff, and student body of the Mailman School of Public Health and Columbia University.
