PROJECT EXPERIENCE

Project Name: PaDetector - A Household Device for HPV Detection

10/2018-04/2019

Position: Project Leader

- Invented a detective device for early screening of HPV by sampling female menstrual blood
- Synchronized two detection methods that were based upon DNA endonuclease and hybrid chain reaction respectively
- Solved the problem of low rate of HPV testing during females' periods

Project Name: iGEM (International Genetically Engineered Machine Competition)

2019/04/2019

Position: Team Leader

- Led a team to participate in iGEM 2019 and took charge in schedule planning, direction determination and task allocation
- Participated proactively in various seminars and meetups to publicize our project
- Won Gold Medal thanks to comprehensive project realization and spectacular project presentation

Project Name: Research on the Status Quo of University Students “Staying Up”

10/2018-04/2019

Position: Project Assistant

- Conducted an in-depth investigation of the status quo of students' staying up late at Zhejiang University
- Analyzed why college students stayed up late and proposed suggestions to help students manage time efficiently and acquire adequate sleep
- Promoted relevant knowledge to make more students aware of the side effects of staying up late on their health
- Took charge in topic selection, literature research, popular science essay writing, and composition of final report

PRACTICAL EXPERIENCE

Investigation on the Development of Ancient Streets

07/2020-08/2020

- Investigated the protection and development of Kuanzhai Alleys in Chengdu, especially the living conditions of nearby residents and practitioners of traditional handicrafts, as well as service industry in Kuanzhai Alleys
- Compared the preservation of Kuanhai Alleys with ancient streets in other areas of China (such as Hangzhou and Ma'anshan) and discovered some general principles as well as applicable methods of protecting ancient streets
- Participated in the field survey of ancient streets in Hangzhou and Chengdu and shot relevant videos

Investigation on Guizhou Water Pollution Control

07/2020-08/2020

- Investigated, evaluated and analyzed sewage treatment condition in factories, thermal power plants, and sewage treatment plants in Guizhou,
- Coordinated with the local environmental protection departments to plan the visits
- Composed a report highly rated by ZJU in recognition of students' social practice
